- Q) WAP to create an item collection & clones the items using AngularJS directives.

```
<!doctype html>
<html>
<head>
<script src = "https://ajax.googleapis.com/ajax/
libs/angularjs/1.3.14/angular.min.js">
</script>
<style>
div {
border: 1px solid green;
width: 100%;
height: 50px;
display: block;
margin-bottom: 10px;
text-align: center;
background-color: yellow;
}
</style>
</head>
<body ng-app = "" ng-init = "students = ['saurabh', 'Abhi', 'sam']">
<ol>
<li ng-repeat = "name in students">
{{ name }}
</li>
</ol>
SOHIT PASPOLA MCA B 20551250
<div ng-repeat = "name in students"> {{ name }} </div>
</body>
</html>
```

Q) WAP to create an HTTP server ---

```
const http = require("http")
const server = http.createServer((req, res) => {
  if (req.url === "/" localhost)
    res.end("you are at home page")
  else if (req.url === "/contact")
    res.end("you are at contacts")
  else
    res.writeHead(404)
    res.end()
})
```

```
server.listen(4002, "127.0.0.1", () => {
  console.log("Listening to the server")
})
```
