Q2 → HTTP Server -- which can communicate b/w client & Server

```
⇒ var http = require('http')
   var server = http.createServer(function(req, res) {
     res.writeHead(200, {
       'Content-Type': 'text/plain'
     });
     res.end("My name is Pushpendra, I am from yehu.\n");
   });
   server.listen(7000);
   console.log("Listening to the Server...");
```

*Push*

My name is Pushpendra Rawat .
