

Name : DEEPESH KUMAR

Course : MCA 3A

2. Write a program to create an HTTP server which can communicate between client and the server.

```
const http = require("http")
const server = http.createServer((req,res) =>{
  if(req.url=="/")
    res.end("You are at home page")
  else if(req.url=="/contact")
    res.end("You are at contacts")
  else
    res.writeHead(404)
    res.end()
})
server.listen(4002,"127.0.0.1",()=>{
  console.log("Listening to the graphic era server....")
})
```

Date. _____

Page No. _____

```
const http = require ("http")
const server = http.createServer ((req, res) => {
  if (req.url === "/")
    res.end ("You are at home page")
  else if (req.url === "/contact")
    res.end ("You are at contacts")
  else
    res.writeHead (404)
    res.end ()
})
server.listen (4002, "127.0.0.1", () => {
  console.log ("listening to the graphic era server...")
})
```

OUTPUT
