Q2 ⇒ WAP - - - - -

Sol ⇒ Code -

```
const http = require("http")
const server = http.createServer((req, res) => {
  if (req.url === "/")
    res.end("You are at home page")
  else if (req.url === "/contact")
    res.end("You are at contact page")
  else
    res.writeHead(404)
    res.end()
})
server.listen(4002, "127.0.0.1", () => {
  console.log("Listening to the server")
})
```
