2) Write a program to create an HTTP server which can communicate between client and the server.

```
const http = require("http")
const server = http.createServer((req, res)
=>{
  if (req.url === "/" )
    res.end("You are at home page")
  else if ( req.url === "/contact" )
    res.end("You are at contacts")
  else
    res.end()
})
server.end()
server.listen(4002, "127.0.0.1", ()=>{
  console.log("listening to the graphic  
era server ....")
})
```
