Q2) Source Code :

```
const http = require ("http")

const server = http.createServer((req, res) => {
    if (req.url == "/")
    res.end ("You are at home page")
    elseif (req.url == "/contact")
    res.end ("You are at contacts")
    else
    res.writeHead (404)
    res.end ()
})
server.listen (4002, "127.0.0.1", () => {
    console.log ("Listening to the server...")

})
```

Ankit

You are at home page

```
[→   ~ node node.js                                                              ]
Listening to the server....
```
