(2)

```
const http = require ("http");
const host = 'localhost';
const port= 8000;

const server = http. createServer(requestlistener);
server.listen (port, host, () => {

    console. log (" Server is running: // $ host ): $port)');
});
```

main.js

```javascript
1  const http = require("http");
2
3  const host = 'localhost';
4  const port = 8000;
5
6  const requestListener = function (req, res) {};
7
8  const server = http.createServer(requestListener);   I
9  server.listen(port, host, () => {
10     console.log(`Server is running on http://${host}:${port}`);
11 });
```
